### *The Astronaut Art and The Leopard Art Collections*

FOUNDED IN 1867 BY MILLAGE Massih and still operated by the Massih family, Millage (millage.com) manufactures fine men's and women's wristwatches that combine functionality with elegance in its own factories in Europe. Headquartered in Los Angeles since 1997, they offer more than 100 styles in 18-karat gold, platinum, stainless steel, and high-tech alumi, as well as 80 different dial colors, available across a wide range of price points.

A member of Millage's highly sophisticated timepiece collection, Millage's The Astronaut Art Collection is completely handmade and hand-engraved. The dial represents an astronaut's image commandeering a spaceship and it's professionally engraved on the movement dial. The bracelet is genuine leather with a delicate clasp buckle, and the piece boasts sapphire crystal and a stainless steel case, and is water resistant up to 165 feet.

Another luxurious timepiece offering, The Leopard Art Collection is also completely handmade and hand engraved. The dial represents a leopard's image sitting on a tree branch and is professionally engraved on the movement dial. The watch boasts a genuine leather bracelet with a luxury deployment buckle clasp type, a mechanical movement, sapphire crystal, an 18-karat yellow gold over stainless steel case, and 18-karat gold over stainless steel bezel material.

Millage offers a variety of sophisticated watch types for even the most discerning clientele, all reflecting their 144-year-old tradition of making elegant and unique design and quality timepieces, which can be purchased online or at authorized dealers nationwide. ●
